

Performance Rider

PROJECT DYNAMITE

For Stage:

Staging

A minimum space of 12' x 12' x 24' is required.

Sound

Project Dynamite can provide its own sound equipment for crowds up to 500. For larger audiences please supply a PA system with two XLR inputs for microphones and an input for an ipod.

Lighting

Working with Project Dynamite has never been easier. No special lighting cues required. It's as simple as lights on, funny funny funny, lights off. Actually, it's important that we are backlit for technical juggling purposes

For Street:

Staging

A minimum space of 12' x 12' x 24' is required. This space must ideally be located away from any excessively loud areas (*areas near musicians, power generators, and loud speakers are bad*). This space should also be in a high foot traffic area.

Sound

Project Dynamite can provide its own sound equipment for crowds up to 500. For larger audiences please supply a PA system with two XLR inputs for microphones and an input for an ipod.

Hospitality:

Food

Varies by venue. Bottled water is always asked to be provided.

On-site accommodations

We encourage an on-site area for changing into costumes as well as a secured space to store our show equipment overnight.

Hotel

Project Dynamite requires beds to sleep in, especially nice ones. Hotels within walking distance to the event are always preferred.
